To Whom It May Concern:

Enclosed please find two copies of the Notice of Decision (NOD) for the CEQA document prepared for Proposed Amended Rule (PAR) 1144 – Vanishing Oils, Direct Contact Lubricants, Metal Working Fluids and Rust Inhibitors. The Final Draft Environmental Assessment (EA) for PAR 1144 was prepared pursuant to CEQA and the South Coast Air Quality Management District's (SCAQMD) certified regulatory program. The CEQA document was certified by SCAQMD's Governing Board at its July 9, 2010 Public Hearing. Please record and post the NOD according to the provisions of CEQA.

SCAQMD Rule 110 requires that written responses to public comments on a SCAQMD CEQA document be filed with the Secretary of Resources along with the Notice of Decision. Five comment letters were received from the public; however, only one of the comment letters addressed the Draft EA. The comment letter that addressed the Draft EA and response to comments are included in Appendix C of the attached Final EA for PAR 1144.

It was determined that the proposed project qualifies for the “no effect” fee exemption in accordance with recently revised Department of Fish and Game Code §711.4, Title 14, California Code of Regulations (CCR) and, therefore, a copy of the signed Fish and Game “no effect” fee exemption form is attached to prove compliance and ensure immediate posting of the NOD.

Please confirm receipt of one copy of the NOD and return it to the undersigned. Two return envelopes have been provided for your convenience (one for the confirmed copy upon receipt, and one for the original NOD to be returned after the posting period). If you have any questions, please call me at (909) 396-3054 or James Koizumi at (909) 396-3234.

Project Description: The objective of PAR 1144 is to fully implement the 2007 AQMP control measure CTS-01 – Emission Reductions from Lubricants. The proposed amended rule would accomplish this by adding VOC content limits for two new working fluid categories: direct-contact lubricant and metal working fluid; adding a VOC content limit for a new rust inhibitor sub-category, military specified preservative; requiring record keeping of affected working fluids and revising the test method used to determine VOC content. The proposed amended rule would affect metal working operators that use vanishing oils, direct contact lubricants, metal working fluids and rust inhibitors during manufacturing and assembly operations. .
