Hello my name is Rocio, from Maywood CA. I'm here to ask this board to stand up to the freight industry and require the ports to clean up pollution through zero emissions technology. This is important to me because the emissions released affect communities around LA. I know first hand how aqmd, not enforcing rules, affected my life. As a community worker on the Exide project--I ingested dessel in what was supposed to be drinkable water because AQMD did not prioritise human health. This is one example of why it is important for aqmd to not only make, but closely enforce rules. The community depends on you to do the right thing, treat our home like it was your own.

Thank you for your time.

Rocio from Maywood
