

VOLUNTARY SOUTHLAND GREENHOUSE GAS REDUCTION PROGRAM TO BE DEVELOPED

On June 6, AQMD approved a preliminary plan for developing a greenhouse gas emission reduction program dubbed the SoCal Climate Solutions Exchange.

This program “will give businesses and individuals assurance that they are purchasing real carbon offsets and that they are investing in the local economy,” said William Burke, AQMD’s Chairman.

Companies could purchase carbon reductions from the exchange to mitigate emissions from new projects under the California Environmental Quality Act. Companies or individuals also could purchase these reductions to offset their “carbon footprint.”

The SoCal Climate Solutions Exchange program will set up a mechanism allowing generation of greenhouse gas reductions within the AQMD’s four-county jurisdiction. Reductions must meet strict criteria including following specific protocols and representing emission reductions that are in addition to any regulatory requirements.

AQMD will consider adopting incentives for reducing emissions in environmental justice areas – those with low household incomes and relatively high levels of air pollution.

Carbon emission reduction credits will be certified by AQMD and any exchanges will be registered and tracked. The program builds on AQMD’s more than 30 years of experience in managing emissions reduction credits for nitrogen oxides, sulfur oxides,

particulates and other pollutants. While the SoCal Climate Solutions Exchange is aimed at reducing emissions of carbon dioxide and other greenhouse gases, it is likely to result in simultaneous reductions of smog-forming pollutants.

AQMD staff now will develop specific rules governing the program that will be considered by AQMD’s Board this fall. The SoCal Climate Solutions Exchange is being closely coordinated with the state’s implementation of AB 32, California’s global warming emissions reduction program.

For more information, contact Jill Whynot at (909) 396-3104.

Cleaning the air
that we breathe...

Volume 15
Number 4
July 2008

U.S. Senator Barbara Boxer Recognized as “Environmental Legislator of the Year” by AQMD

On April 26, 2008, AQMD honored U.S. Sen. Barbara Boxer with its first-ever “Environmental Legislator of the Year” award for her leadership in legislation to reduce ship pollution and regarding other environmental policies. In 2007, Sen. Boxer introduced legislation meant to clean up ocean-going ships -- the largest under-regulated source of air pollution in the Southland. This bill

would require the federal government to adopt tougher air pollution controls for ocean-going vessels.

“Senator Boxer’s commitment to the environmental clean-up of ocean-going ships will help protect the health of millions of Americans and is crucial to achieving health-based air quality standards in many areas of the nation,” said AQMD Chairman William A. Burke, Ed.D. Burke presented the award to Sen. Boxer during a ceremony on the steps of a Santa Monica library.

Sen. Boxer has long been a champion of environmental and air quality issues. “We commend Senator Boxer for her long-term, ongoing commitment to clean air issues including the promotion of zero-emission electric vehicles and the removal of subsidies for gas-guzzling SUVs,” Burke said.

For more information, contact Philip Crabbe III at (909) 396-2632.

Marine Vessel Emissions Reduction Bill Successfully Passes out of U.S. Senate Committee

Landmark legislation introduced by U.S. Senator Barbara Boxer that would require tougher pollution controls for container and ocean-going ships cleared a major hurdle after it successfully passed out of the U.S. Senate Committee on Environment & Public Works. The "Marine Vessel Emission Reduction Act" (S. 1499) was considered during a markup committee hearing in Washington, D.C. on May 21st. The hearing was presided over by Sen. Boxer, who is Chair of the committee.

The bill received bipartisan support in committee and now awaits consideration by the full Senate. "This legislation is key to efforts to reduce ship emissions, which are a significant source of air pollution not just in Southern California, but also in port areas across the nation," said William Burke, Ed.D., AQMD's Chairman. "We are very encouraged by the support it received today in the Senate Committee."

S. 1499 is co-sponsored by U.S. Sen. Dianne Feinstein and has a companion bill in the U.S. House of Representatives, H.R. 2548, authored by U.S. Congresswoman Hilda Solis. The legislation would require the federal government to adopt tougher

pollution controls for large ships in order to achieve substantial reductions in ship emissions. Specifically, the legislation would:

- Require foreign and domestic ocean-going ships to use low sulfur fuel within a certain number of miles from the U.S. coastline, by Dec. 31, 2010. Consequently, fuel sulfur content would be reduced from the current average of 27,000 parts per million (ppm) to a maximum of 1,000 ppm; and
- Require controls to be put on ship engines that would substantially reduce their emissions of nitrogen oxides (NOx), by Jan. 1, 2012.

Southern California cannot achieve federal air quality health-based standards by the 2015 deadline unless emissions from

ships are greatly reduced. In Southern California, it is estimated that approximately 800 premature deaths per year result from exposure to particulate pollution from large marine vessels. Furthermore, research shows that particulate pollution from ocean-going ships causes at least 2,000 to 5,000 premature deaths per year in the continental U.S. These deaths are in addition to the numerous other health effects that are caused by marine vessel emissions, including respiratory diseases, such as asthma, cardiopulmonary disease, and cancer.

For more information, contact Philip Crabbe III at (909) 396-2632.

Architectural Coatings Fee Rule Adopted

At its June Meeting, the AQMD's Governing Board adopted Rule 314, in order to assess and recover the program costs to the AQMD for implementing Rule 1113 (Architectural Coatings), and including the program's fair share of AQMD costs that are apportioned among all AQMD programs, such as personnel, payroll, etc.

The rule will also provide staff with architectural coating quantity and emission data information for planning, compliance, and rule development. The rule also addresses the function of staff assigned to inspections, planning, and rule development, laboratory services, legal, administrative, and monitoring and analysis as well as support personnel.

Under the provisions of Rule 314, architectural coating manufacturers are required to:

- Apply for company identification number unless they already have one in AQMD records.
- Submit an Annual Quantity and

Emissions Report certified by a Responsible Party.

- Maintain sufficient records to verify data necessary to determine annual architectural coating sales and VOC emissions in the District, and compliance with applicable rules and regulations.
- Use approved test methods to determine VOC content of the coatings.

The fees for architectural coatings are authorized by the California Health and Safety Code and are based on the annual quantity and associated emissions from architectural coatings, distributed or sold for use in the AQMD's jurisdiction. Rule 314 also requires architectural coatings manufacturers to provide a list of all their distributors located in the U.S.; and includes an exemption from fees for architectural coatings containing 5 grams or less of Volatile Organic Compounds (VOC) per liter of material.

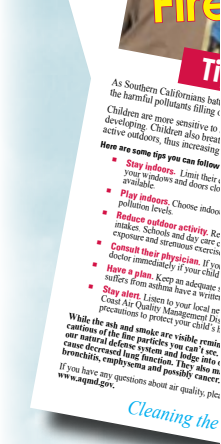

The cost of the program, which

includes the strengthening of the enforcement and laboratory efforts dedicated to the program, is projected to be approximately \$4.6 million for 2009-10, which equates to approximately 8 cents per gallon, based on estimated quantity of coatings, and is anticipated to be passed on to the end-user by the manufacturers. Staff estimates that the rule will impact approximately 200 architectural coating manufacturers.

For more information, please contact Larry Bowen at (909) 396-2575.

Fire Safety Health Tips Available During Wildfire Season

South Coast Air Quality Management District

Fire Safety Alert

Tips for Residents

As Southern Californians battle the wildfires, there are measures we all can take to protect our health from the harmful pollutants filling our air.

If you are a healthy individual, the ash and smoke from the fires can irritate your eyes and airways, cause coughing and/or a scratchy throat. They can also irritate your sinuses, cause headaches or a runny nose. In addition to short-term effects, there may be long term effects that can significantly impact your health.

Here are some tips you can follow to protect you and your family members from unhealthy air:

- **Stay indoors.** Choose indoor options when air pollution levels are unhealthy. Keep your windows and doors closed. Use your air conditioning system and place it on recirculation mode, if available.
- **Reduce outdoor activity.** Reducing your physical activity in outdoor areas lowers the amount of polluted air your body intakes. Curtail your involvement in outdoor activities and events that require prolonged exposure and strenuous exercise or sports participation.
- **Stay alert.** Listen to your local news and weather forecasts and air quality alerts provided by the South Coast Air Quality Management District (AQMD). If the air quality in your area worsens take necessary precautions and plan your activities accordingly.

While the ash and smoke are visible reminders of the pollution currently impacting our area, be even more cautious of the fine particles you can't see. These particles, which are invisible to the naked eye, bypass our natural defense system and lodge into our lungs. They can cause irritation, and over the long-term cause decreased lung function. They also make us more susceptible to developing diseases such as asthma, bronchitis, emphysema and possibly cancer.

If you have any questions about air quality, please call AQMD at 1-800-CUT-SMOG or visit our website at www.aqmd.gov.

Cleaning the air that we breathe..."

As the Southland prepares for yet another long and hot summer fire season, the AQMD wants area residents to know that there is information already available for them on all the measures that we can take to protect our health from the harmful pollutants filling the air during wildfires.

In recent years, in order to help protect the public's health from the ill effects of smoke and ash from fires, the AQMD has produced and made available Fire Safety Alert Tip information sheets. The three information sheets include: Tips for Residents; Tips for Children; and Tips for Seniors

The tips in these three information sheets for residents, children, and seniors, all provide guidance that individuals and families can follow to protect themselves from being exposed to unhealthy air during fires. Some of the tips include:

- Everyone avoid all vigorous exertion, indoors or out;
- Residents with heart disease, respiratory diseases including asthma, as well as the elderly and children remain indoors.
- Keep windows and doors closed unless it is extremely hot inside, in which case, seek alternative shelter; and
- Turn on air conditioner if you have one. Keep the fresh air intake closed and the filter clean to minimize outdoor smoke entering the house.

For additional tips on avoiding the health risks from smoke during fires, obtain a copy of any/or all three of the Fire Safety Alerts information sheets, on AQMD's website at: <http://www.aqmd.gov/pubinfo/factsheets.htm>; or call the AQMD's Public Information Center 1-800-Cut-Smog (1-800-288-7664), to request that a copy(s) be mailed to you.

For more information, contact Lourdes Cordova Martinez at (909) 396-3214.

Breathe Easier With EnviroFlash: Air Quality Info Straight to Your Inbox

Area residents can now have the South Coast Air Quality Management District's (AQMD's) local air quality forecast notifications e-mailed to them directly, and on a daily basis, by participating in the U.S Environmental Protection Agency's (EPA's) EnviroFlash program.

EnviroFlash is a free system that the EPA has partnered with AQMD on to provide the public with easy access to national and local air quality information. Your e-mail notification will show your forecast, tips for limiting your exposure to pollution and helpful hints for reducing your own contribution to air pollution. Signing up is easy. Go to EnviroFlash at www.enviroflash.info and just set your preferences and you can get a message every day, or only on days when air pollution reaches a certain level.

In our busy world it can be easy to forget to check the air quality forecast. That's where

EnviroFlash can help. Your notification will show your forecast, tips for limiting your exposure to pollution and helpful hints for reducing your own contribution to air pollution. Receiving this information is very important during our current local smog season (May 1 until October 3), especially for parents, teachers, coaches, day care providers, and anyone who supervises active children, adults, the elderly, and those with respiratory disease such as asthma, and heart and cardiovascular diseases.

Air quality affects how you live and breathe. Knowing your air quality forecast and understanding the Air Quality Index (AQI) can help you plan your daily activities and reduce your exposure to pollution. The AQI is the color-based index for reporting daily air quality; including how clean or polluted the outdoor air is in a specific location and what associated health effects may result for the local population.

Current air quality readings and forecasts for the entire basin can also still be obtained from the AQMD web page at www.aqmd.gov/smog, or by phoning the automated voice recording system at 1-800-288-7664.

For more information, contact Kevin Durkee at (909) 396-3168.

**South Pasadena
Clean Air Car Show
and Film Festival**

**Sunday, July 20, 2008
El Centro Street and Fair Oaks Avenue
in the City of South Pasadena
11 am to 6 pm**

With gasoline prices going sky-high and concerns about global warming increasing every day, more and more Southern Californians are asking, "What can I do to save money AND save the planet?" One of the answers is to seek alternatives to gas-guzzling cars that pollute the air and keep costing more to operate. To help educate the public about clean-air cars and other options for transportation, the City of South Pasadena invites all Southland residents to its Clean-Air Car Show and Film Festival! Highlights include:

- A wide selection of current and next-generation-technology vehicles including: Hybrid, Plug-in Hybrid, Electric, Hydrogen, Fuel Cell, CNG and PZEV!
- Free movies on the Big Screen in the historic Rialto Theatre all day!
- Informational exhibits from health, environmental, energy, automotive and transportation organizations!
- Mini-seminars from leading experts on topics like climate change, health effects of pollution, and alternative fuels development!
- Visits from local dignitaries, elected officials and community leaders!
- Fun for the whole family, including an area just for the kids!
- Food will also be available for purchase.

AQMD Governing Board Members Michael Cacciotti and Michael Antonovich will participate in the opening ceremony for this event.

For more information, contact Rainbow Yeung at (909) 396-3373 or visit www.ci.south-pasadena.ca.us/whatsnew/cleanaircarshow.html

Register Now for "The Future is Green Conference and Expo"

The Future is Green Conference and Expo on New and Emerging Clean Air Technologies and Innovations" will be held at the Long Beach Convention Center September 14-16, 2008. Earlybird conference registration rates will be available until July 31st. For information, and to register on-line, go to www.capcoagreen.com.

The conference is being hosted by the California Air Pollution Control Officers Association (CAPCOA), and will include sessions on:

- Renewable Power Generation
- Clean Fleet Vehicles and Technologies
- Green Consumer Products
- Green Building Design
- Clean Fuels
- Clean Transportation Systems
- Green Agricultural Equipment and Operations

A special workshop (additional fee) will be conducted Sunday afternoon for people interested in "How to Start a Green Business." There will also be a half-day Teach-

er's Workshop (free for teachers, but registration required) on Sunday afternoon. And teachers are being encouraged to bring groups of high school students to attend special sessions and view the expo on Monday and Tuesday.

The Public is invited to attend the Expo free of charge on Sunday, September 14th. There will be over 100 exhibits and many clean fuel vehicles on display.

For more information, contact Larry Kolczak (909) 396-3215.

The Future is Green Conference and Expo:
**New and Emerging Clean Air
Technologies and Innovations**
Sept. 14-16, 2008
Long Beach Convention Center

A Conference and Expo on New and Emerging Clean Air Technologies and Innovations

The South Coast Air Quality Management District participated in a Clean Air Car Showcase held in May in Long Beach. KABC radio organized this event and four automakers (Ford, Nissan, Subaru, and Toyota) displayed and provided ride & drives in vehicles on AQMD's Clean Air Choices website and/or scored 8 or better out of 10 based on ARB's Drive Clean criteria. Chrysler displayed advanced concepts cars and GEMs (neighborhood electric vehicles) for ride & drive. ARB and AQMD shared a booth, and Governing Board Member Tonia Reyes-Uranga was interviewed on-air by Leon Kaplan during his Motorman radio show.

For more information, contact Lisa Mirisola at (909) 396-3215.

**Clean Air
Car Showcase**

Home Energy Management Technology Forum

The AQMD is hosting a free one-day forum and roundtable of experts discussing energy efficient technologies for the home. These include smart metering, energy efficient appliances and consumer electronics, home energy storage, distributed generation, LEED certification, and other ways to reduce your carbon footprint. The panel will offer presentations in the morning, followed by a roundtable discussion and public question and answer period in the afternoon.

California's energy policies have been significantly impacted by the passage of AB 32, which requires the state's greenhouse gas emissions to be reduced to 1990 levels by 2020. Promoting energy efficient technologies and practices to create a "smart home" will help ensure that California residents meet their future energy needs. Such smart home technologies and practices must also ensure air quality is not adversely impacted.

The AQMD encourages anyone interested in this topic to attend this free forum. No registration is required. The forum will also be webcast live, and following the event, copies of the agenda, presentations and the webcast will be posted on the AQMD's Technology Forum/Roundtable website at: <http://www.aqmd.gov/tao/ConferencesWorkshops/techforum.htm>.

If you have any questions, please contact Patricia Kwon at (909) 396-3065 or pkwon@aqmd.gov.

July 31, 2008 -- 9 a.m. to 4 p.m.
South Coast AQMD Headquarters
Auditorium

20th Annual Clean Air Awards

The South Coast Air Quality Management District will pay tribute to individuals, community groups and businesses that have made significant contributions toward cleaner air at the agency's 20th Annual Clean Awards. The October 1 awards luncheon will be emceed by NBC4 weathercaster Fritz Coleman and will serve to recognize award winners in the categories of advancement of air pollution control technology, innovative transportation projects, model community achievements, public education on air quality issues, and promotion of good environmental stewardship. Additional awards are given for leadership in government, and for outstanding contributions in the field of air pollution health research. This year's luncheon will be held at the Millennium Biltmore Hotel in downtown Los Angeles. Tickets are \$35 each, or \$350 for a table of ten. To reserve your seat or table, call Geri Bowen at (909) 396-2778, or e-mail her at gbowen@aqmd.gov.

RULE UPDATE

The following proposed and amended rules and regulations are tentatively scheduled for hearing at upcoming Governing Board meetings. To verify whether scheduling changes have occurred, visit the AQMD Web site at www.aqmd.gov/hb/gb_cal95.html and check the Rule and Control Measure item on the Governing Board meeting agenda or call the Clerk of the Board's Office at (909) 396-2500.

Copies of AQMD rules and regulations can be downloaded from the Web site at www.aqmd.gov/rules/rules.html or provided by AQMD's Public Information Center, (909) 396-2039.

July

Proposed Amended Rule 1610 - Old Vehicle Scrapping -

Amendments would reinstate the vehicle residency requirement in the District to 24 months from 120 days and revise language to improve consistency with the state regulation. *For information, contact Dave DeBoer at (909) 396-2329 or ddeboer@aqmd.gov.*

Proposed Amended Rule 1158 - Storage, Handling and Transport of Petroleum Coke -

Amendments would address an increase in certain operations, or operations not previously envisioned when the rule was adopted; clarifications to requirements to improve enforceability; and removal of obsolete language from the rule implementation phase-in. *For information, contact Jill Whynot at (909) 396-3104 or jwhynot@aqmd.gov.*

August - No Board Meeting

September

Proposed Rule 433 - Natural Gas Fuel Specification -

The proposed rule would reduce emissions of NOx by establishing an upper higher-heating value limit for natural gas fuel. *For information, contact Joe Cassmassi at (909) 396-3155 or jcassmassi@aqmd.gov.*

Proposed Amended Rule 1108 - Cutback Asphalt -

The amendments would further reduce VOC emissions. *For information, contact Larry Bowen at (909) 396-2575 or lbowen@aqmd.gov.*

Proposed Amended Rule 1146 - Emissions of Oxides of Nitrogen from Industrial, Institutional, and Commercial Boilers, Steam Generators and Process Heaters – The AQMD is currently proposing to reduce the allowable NOx emission limits from 30 ppm to 12, 9 or 5 ppm, depending on equipment size and operational characteristics, as well as recognizing energy efficiency. Proposed compliance limits for units burning landfill or digester gases are 25 and 15 ppm, respectively. Other proposed changes include requiring annual tune-up procedures and monthly maintenance procedures, limiting time to derate equipment, and applying a 30 ppm limit to low fuel usage equipment by January 1, 2015 or at burner replacement, whichever occurs later.

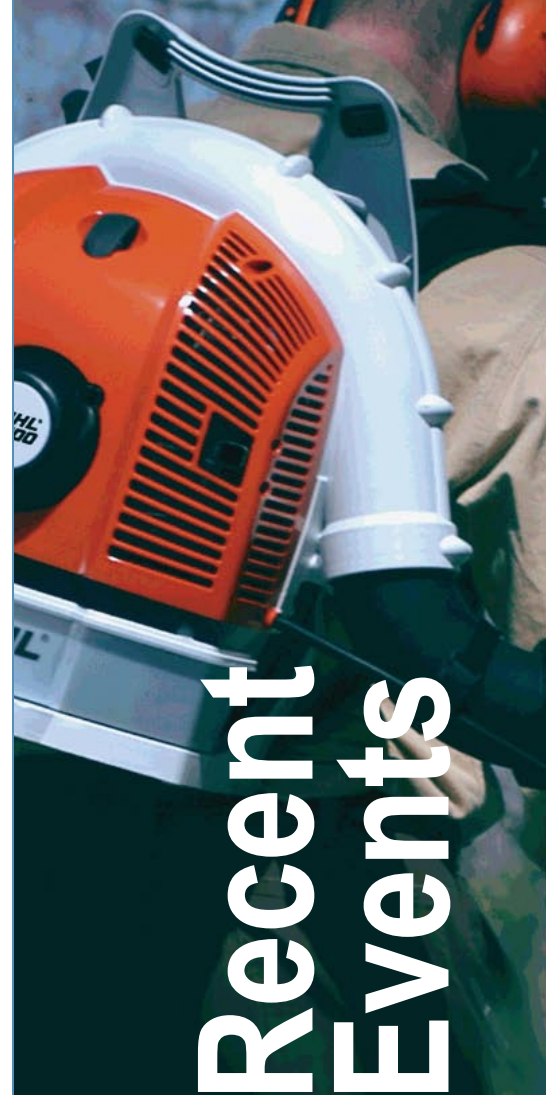

Proposed Amended Rule 1146.1 - Emissions of Oxides of Nitrogen from Small Industrial, Institutional, and Commercial Boilers, Steam Generators and Process Heaters – The proposed amendment to this rule would reduce the allowable emission limits of NOx from units with the application of low-NOx or ultra low-NOx burners with or without the use of flue gas recirculation (FGR). It is also the intent of this proposed amendment to harmonize the NOx compliance limits with those limits proposed for Rule 1146 and established in Rule 1146.2.

Proposed Rule 1147 - NOx Reductions from Miscellaneous Sources - The proposed rule will require combustion equipment not regulated by existing rules to meet emission limits for nitrogen oxides. *For information, contact Joe Cassmassi at (909) 396-3155 or jcassmassi@aqmd.gov.*

Registration for Low-Polluting Leaf Blower Exchange Begins July 15, 2008

Commercial gardeners (including city public works departments, school districts, park districts, etc.) are being encouraged to trade in their old, two-stroke-engine leaf blowers and purchase a new STIHL BR 500 backpack blower (a \$470 value) for just \$200. The STIHL BR 500 blower has the lowest engine emissions and the lowest noise levels of any professional model backpack blower on the market.

Gardeners must pre-register for one of the exchange events, which will be held in several locations throughout AQMD's four-county jurisdiction. For information, or to register, call toll-free 1-888-425-6247.

Clean Air PEOPLE

Meet the diversely talented people who work at the AQMD

Drue Ann Hargis began working at AQMD when she was only eighteen years old. This is no surprise since she started her first office job in real estate at sixteen! As someone who grew up on a five-acre farm filled with chickens and horses in San Bernardino, Drue developed a strong work ethic at a young age.

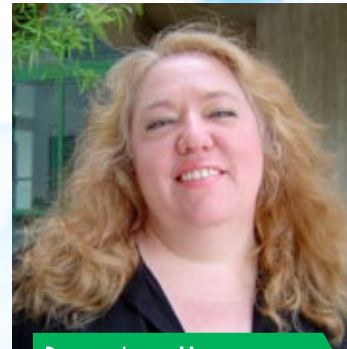

Drue works in the Technology Advancement Office performing contracts administration and event coordination. Her position includes administration of the School Bus Program, coordinating conferences such as the upcoming The Future is Green Conference & Expo, and working on special projects such as preparation of the Clean Fuels Annual Report.

Before working in this position, Drue worked as the Board Committee Liaison in the Executive Office for several years. She's also worked in Public Affairs, Finance, and Engineering.

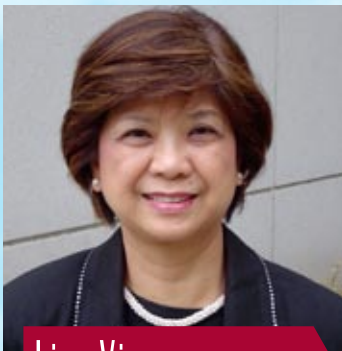

Drue has an A.A. in Liberal Arts from Mt. San Antonio College. She plans to return to school in fall 2009 to work on her bachelor's degree in English. She's also "flirting" with the idea of getting her teaching credentials to teach elementary school.

At home Drue enjoys reading and writing, in particular, stories about children and family life. In the last eight years many of her stories, articles, and essays have been published in various newspapers, magazines, books, and online. She also stays busy with her two sons, Matthew, 15 and Michael, 9. Drue's family has more than a dozen pets including a rosy boa snake, a bearded dragon, three five-toed western box turtles, five cats, and a dog that is a Papillion/long-haired Chihuahua mix.

Drue said, "While I always remember being somewhat environmentally conscientious," as a result of her parents' interests in the environment and wildlife, "working at the AQMD really taught me about mankind's effect on it." She now tries to teach her children the same values and hopes they will one day become environmentalists and leaders.

Drue Ann Hargis

Lisa Virgo

Lisa Virgo, AQMD's Controller, is passionate about our mission of cleaning the air, even in small ways and behind the scenes.

Lisa Virgo started here at the AQMD in June 1989 as a Senior

Accountant. She later became a Financial Analyst, and is now the Controller. In this position Lisa is responsible for accounting, cash management, asset management, and payroll sections. Also, she makes sure AQMD receives the highest obtainable rankings on its audited financial reports. Another important part of her job, she says, is her code of ethics. Lisa stated she must always remain "neutral, impartial, and free from bias."

Before coming to the AQMD, Lisa worked as a controller for a nonprofit organization in Chicago, as well as for an American textile company in Jakarta, Indonesia.

Lisa received a bachelor's degree in Business Administration from the University of Philippines, Manila, and then went on to get her MBA from Roosevelt University in Chicago. She has her CPA (Certified Public Accountant) license in California, Illinois, and the Philippines. Lisa was also an exchange student in Minneapolis, Minnesota before immigrating to the U.S.

Lisa comes from a very big family. She is one of twelve siblings, who have each lived all over the world, and she has traveled extensively visiting them. Now, five of them all live very close together here in Southern California. She is also married and has a son.

In her spare time, Lisa enjoys practicing yoga, doing volunteer work, and playing golf with her son and husband, although she admits she's not nearly as good at the sport as they are.

After working here, Lisa said she has really come to "believe and live the mission of South Coast AQMD," and has developed "a passion for cleaning the air."

Rule Compliance Promotion Classes

Rule 403-Controlling Dust in the South Coast Air Basin

- Every third Wednesday of the month

This half-day class is held at AQMD's Diamond Bar headquarters from 8:30 a.m. to 11:30 a.m. There is no fee, but pre-registration is required. To register, call toll free 1-866-861-DUST (3878) or email dustcontrol@aqmd.gov.

Rule 403.1-Controlling Dust in the Coachella Valley

- Every third Thursday of the month

This course is held from 1:00 p.m. to 4:30 p.m. at the Coachella Valley Association of Governments, Room 119, 73-710 Fred Waring Dr., Palm Desert, CA, 92260. There is no fee, but pre-registration is required. To register, call toll free 1-866-861-DUST (3878) or email dustcontrol@aqmd.gov.

Rule 2202-Employee Transportation Coordinator Training

- July 23, SCAQMD's Diamond Bar Headquarters

- August 6, SCAQMD's Diamond Bar Headquarters
 - August 21, Cathedral of Our Lady of the Angels, Los Angeles
 - September 4, SCAQMD's Diamond Bar Headquarters
 - September 17, Riverside (Location to be announced)
 - October 2, SCAQMD's Diamond Bar Headquarters
 - October 16, OCTA, Orange
 - November 5, SCAQMD's Diamond Bar Headquarters
 - November 19, METRO, Los Angeles
 - December 4, SCAQMD's Diamond Bar Headquarters
- Classes are held from 8:00 a.m. to 5:00 p.m. Registration fee is \$61.70 per person. Enrollment is limited to 20 students and classes will be filled on a first-come, first-served basis. To register, call (909) 396-2777 or e-mail etctraining@aqmd.gov.*

Rule 461-Gasoline Transfer and Dispensing

All classes are held at AQMD's Diamond Bar headquarters from 8:00 a.m. to 5:00 p.m. The Daily class cost is \$50, the Periodic class is \$150 and the Tester class is \$100. The Periodic Self-compliance Class is a two - day class. Pre-registration is required

for these classes. To register, call 909-396-2583 or email ebarrera@aqmd.gov.

- August 8 Tester Orientation Class
- October 9-10 Periodic Self-Compliance Class
- October 17 - Tester Orientation Class
- October 25- Daily Maintenance Self-Compliance Class

Rule 1403-Asbestos Demolition/Renovation Activities

Classes are from 8:00 a.m. - 1:00 p.m., held in CC6 at the SCAQMD's Diamond Bar Headquarters. There is no fee, but pre-registration is required. Please email (jmoore@aqmd.gov) or phone (909-396-2053) your request with Company Name, Attendee Name, Date of class desired and Contact person's phone number. Following is the schedule:

- August 13
- September 17
- October 15
- November 12
- December 17
