RE: Support for Proposed Amended Rules 1111 and 1121

Dear Mr. Krause and Ms. Farr:

I am writing to support the South Coast AQMD's efforts to clean up appliance pollution through amending Rules 1111 and 1121. This proposed regulatory package will achieve more emissions reductions than any other effort passed in over three decades. The effort is also consistent with the 2022 Air Quality Management Plan (AQMP), which determined that "[t]he only way to achieve the required NO_x reductions is through extensive use of zero emission technologies across all stationary and mobile sources."¹

Given the serious pollution in our region, the health gains from advancing zero-emissions technology are desperately needed by millions of people. Therefore, it is vital that these rules go to the Governing Board in a strong form and be adopted in February.

The sooner these rules are adopted, the sooner we can begin the process of transitioning away from combustion in our homes.

Sincerely,

Patricia Pipkin
