Subject: [EXTERNAL] Comments on Rule 1111 & 1121

Mrs. Faye Thomas;

My family recently were made aware of the rules that you're planning to pass that will ban natural gas water heaters and furnaces. We're retired and living on a fixed income. This will make our energy costs completely unaffordable due to the already high cost of electricity. The replacement costs required to be compliant are unbelievable and unrealistic. Please withdraw your support.

Please direct my comments to members of the governing board.
