Subject: Refinery Safety

Dear officials tasked with keeping our community safe,

Nothing short of a ban on MHF and demanding that the last two California refineries that use this dangerous chemical SWITCH NOW to safer alternatives is going to fix this problem. These pathetic band-aids will not keep our throats and lungs from being burned by a release of this gas. Torrance Refinery especially has a dismal "safety" record and a contempt for Torrance citizens. Do the right thing already and ban MHF.

Best,

Isabel
