

WHEREAS: Southern California Assemblymember Al Maratsuchi wants the South Coast Air Quality Management District (SCAQMD) to adopt Rule 1410's hidden gas tax, which would ban the use of modified hydrofluoric acid in California.

WHEREAS: Refineries use this during alkylation, a process required for developing the clean burning gasoline that meets California's stringent clean fuel requirements.

WHEREAS: No refinery in the world has ever switched from the use of hydrofluoric acid to another technology. A ban would have devastating consequences for Southern California's jobs, working families and the regional economy.

WHEREAS: Rule 1410 could force offline or shutdown two Southern California Refineries and eliminate local jobs.

WHEREAS: Rule 1410 could eliminate 25% of regional fuel supply, creating shortages and massive price spikes.

WHEREAS: Rule 1410 could stall out the regional economy – hurting ports, airports and the trucking industry.

WHEREAS: An analysis by Stillwater & Associates concluded Rule 1410 could cause gas price increases of up to 25 cents a gallon.

BE IT RESOLVED: California consumers already pay among the highest gas prices in the nation! SCAQMD should reject Rule 1410!
