S.C.A.Q.M.D

From Joe Munson, 917 4th St. Man Bch, Ca 90266

as a resident of the South Bay, I am
EXTREMELY concerned about the use of
MHF at two of our local refineries.
This deadly, toxic substance should
not be used in this highly populated
area with known earthquake activity.
Since all the other refineries in the
state have found a way to operate with-
out MHF it is unacceptable that it
is still in use here. The request to build
a MHF unit near Bakersfield was denied
because it is too dangerous. There is no
excuse for our local plant to be able to
use it. You are putting millions of lives
at risk.
