

PR 2301 Concept Construction Emissions

Draft

APPLICABILITY

1. Construction NOx emissions greater than 2 tons per year; or
 2. Construction period is greater than 6 months*
- * Preliminary criteria noted for discussion purposes

CONSTRUCTION EMISSIONS

ON-SITE CONSTRUCTION EMISSIONS STRATEGY

Reduce construction NOx emissions:

1. Subject to AQMD Rule 2449 – Control of Oxides of Nitrogen Emissions from Off-Road Diesel Vehicles (SOON Program); or
2. Voluntarily participate in AQMD Rule 2449 or submit a proposal for a Carl Moyer Program Grant and implement the project if awarded

Note: EGM-01 may include a local delegation component in which a local or regional jurisdiction may elect to implement a program comparable to AQMD's for reviewing applications or to be exempted from the rule by adopting an ordinance equal to or more stringent than the rule.
